FUND STRATEGY

- Invest in mid-cap stocks through a variety of external mid-cap managers who have distinct investment styles and strategies.
- Select complementary managers from a broad universe of investment managers.
- Blend managers into a single fund in an effort to provide the best combination of risk and return.

SUB-ADVISER ALLOCATION

SUB-ADVISER	TARGET ALLOCATION	ROLE IN PORTFOLIO
SYSTEMATIC FINANCIAL MANAGEMENT	30%	Relative value approach seeks companies trading at low valuations that have seen some signs of positive earnings momentum.
LSV ASSET MANAGEMENT	30%	Deep value style with quantitative approach. Systematically exploits judgmental biases and behavioral weaknesses influencing investors.
GENEVA CAPITAL MANAGEMENT	20%	Conservative growth style expected to protect capital during difficult growth markets.
TCW INVESTMENT MANAGEMENT	20%	Aggressive growth style expected to provide strong up-market capture during strong growth.

PERFORMANCE as of 3/31/10

FUND	ANNUALIZED						
	QUARTER	YTD	1-YEAR	3-YEAR	5-YEAR	10-YEAR	SINCE INCEPTION
FUND	8.10%	8.10%	62.34%	-1.69%	—	—	1.82%
RUSSELL MIDCAP® INDEX ²	8.67%	8.67%	67.72%	-3.30%	—	—	1.77%
MORNINGSTAR CATEGORY AVG MID CAP BLEND	7.78%	7.78%	62.63%	-3.59%	—	—	—

Performance quoted represents past performance and does not guarantee future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown here. Performance data current to the most recent month end is available by calling 800-595-9111.

Performance calculations reflect voluntary fee waivers in effect. In the absence of fee waivers, total return, growth since inception and dividends would have been reduced. Total return is based on net change in NAV assuming reinvestment of distributions. The recent growth rate in the stock market has helped to produce short-term returns that are not typical and may not continue in the future. Because of ongoing market volatility, fund performance may be subject to substantial short-term changes.

Equity Risk: Equity securities (stocks) are more volatile and carry more risk than other forms of investments, including investments in high-grade fixed income securities. The net asset value per share of this Fund will fluctuate as the value of the securities in the portfolio changes.

Mid Cap Risk: Mid-capitalization stocks typically carry additional risk, since smaller companies generally have higher risk of failure and, historically, their stocks have experienced a greater degree of volatility.

¹ The Net Expense Ratio includes voluntary expense reimbursements by Northern Funds' investment advisers that may change or end at any time.

A Risk-Managed Investment Approach

Northern Trust has built a tradition of strength and stability in investment management. Markets fluctuate over time, but we have remained steadfast in our disciplined, risk-managed investment philosophy.

² **Russell Midcap[®] Index** is an unmanaged index measuring the performance of the 800 smallest companies in the Russell 1000[®] Index. It is not possible to invest directly in an index.

Trailing 12-month Price to Earnings Ratio: The sum of a company's price-to-earnings. Calculated by taking the current stock price and dividing it by the current earnings per share for the past 12 months.

Price to Book Ratio: A ratio used to compare a stock's market value to its book value. It is calculated by dividing the current price of the stock by the latest quarter's book value per share.

Beta: Beta represents the systematic risk of a portfolio and measures its sensitivity to a benchmark.

Up Market Capture: Measure of a manager's performance in up markets relative to the market.

Down Market Capture: Measure of a manager's performance in down markets relative to the market.

Information Ratio: A measure of the consistency of excess return.

*Past performance is no guarantee of future results. Ratings reflect fee waivers in effect; in their absence, ratings may have been lower.

Star ratings are based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The overall rating is a weighted average of the 3-, 5- and 10-year (if applicable) returns. 5 stars = top 10% of funds in an asset category; 4 stars = next 22.5% of funds; 3 stars = next 35%; 2 stars = next 22.5% and 1 star = next 10%. A fund must be in existence three years to be rated. Ratings are subject to change monthly. The Multi-Manager Mid Cap Fund received 4 stars for the 3-year rating among 376 mid-cap blend funds. The 5- and 10-year Morningstar Ratings are not available.
