

SHORT-INTERMEDIATE
U.S. GOVERNMENT FUND

FUND FACTS

Fund Objective: Current Income
Inception Date: October 1, 1999
Ticker Symbol: NSIUX
Cusip: 665162756
Gross Expense Ratio: 0.99%
Net Expense Ratio: 0.90%¹
Dividend Schedule: Monthly
Benchmark: Barclays Capital 1-5 Year U.S. Government Bond Index
Morningstar Category: Short Government

FUND CHARACTERISTICS

Total Net Assets: \$831 million
Number of Holdings: 40
30-Day SEC Yield: 0.41%
Average Duration: 2.7 years
Average Maturity: 3.3 years

FUND STRATEGY

- Invest primarily in securities issued or guaranteed by the U.S. government or by its agencies.
- Select high-quality securities with maturities, under normal circumstances, between two and five years, with risk exposure managed in an effort to achieve reasonable returns.
- Buy and sell securities using a relative value approach that employs models that analyze and compare expected returns and assumed risks.

PERFORMANCE as of 6/30/10

FUND	ANNUALIZED						
	QUARTER	YTD	1-YEAR	3-YEAR	5-YEAR	10-YEAR	SINCE INCEPTION
FUND	1.92%	2.83%	4.10%	5.22%	4.12%	4.38%	4.40%
BARCLAYS CAPITAL 1-5 YR U.S. GOVT BOND INDEX ²	1.97%	2.91%	4.18%	6.02%	4.88%	5.11%	5.07%
MORNINGSTAR CATEGORY AVG SHORT GOVT	1.49%	2.47%	4.30%	4.89%	4.04%	4.30%	—

Performance quoted represents past performance and does not guarantee future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown here. Performance data current to the most recent month end is available by calling 800-595-9111.

The Advisor has agreed to reimburse certain expenses of the Fund. The contractual reimbursement arrangement is expected to continue until at least July 31, 2011. After this date, the contractual arrangements may be terminated if it is determined to be in the best interest of the Fund and its shareholders. In the absence of fee waivers, yield, total return, growth since inception and dividends would have been reduced. Total return is based on net change in NAV assuming reinvestment of distributions. The 30-day SEC yield more closely reflects the current earnings of the Fund than the total returns.

Bond Risk: Bond funds will tend to experience smaller fluctuations in value than stock funds. However, investors in any bond fund should anticipate fluctuations in price, especially for longer-term issues and in environments of rising interest rates.

Mortgage-Backed Securities Risk: Mortgage-backed investments involve risk of loss due to prepayments and, like any bond, due to default. Because of the sensitivity of mortgage-related securities to changes in interest rates, the Fund's performance may be more volatile than if it did not hold these securities.

U.S. Government Guarantee: U.S. government guarantees apply only to the underlying securities of a Fund's portfolio and not the Fund's shares.

¹ The Net Expense Ratio, as reported in the most recent prospectus, includes contractual expense reimbursements that, if not extended, will end on July 31, 2011.

Please see back page for calendar year returns and index definitions.

A Conservative Investment Approach

Northern Trust has built a tradition of strength and stability in investment management. Markets fluctuate over time, but we have remained steadfast in our disciplined, risk-managed investment philosophy.

² **Barclays Capital 1-5 Year U.S. Government Bond Index** is an unmanaged index of securities issued by the U.S. government with maturities of one to five years. It is not possible to invest directly in an index.

Average Duration: Duration is a measure of a bond fund's sensitivity to changes in interest rates. The Fund's duration is calculated using the option-adjusted formula.

Quality Distribution: Credit quality ratings primarily originate from data compiled by Barclays Capital within their POINT model. They are based on the conservative average of Moody's, Standard & Poor's, and Fitch ratings. If ratings from all three rating agencies disagree, the model assigns the middle rating to the security. If two of the three agree, the model assigns the rating from those two to the security. If none of these three rating agencies has assigned a rating the Fund will assign a rating of NR (non-rated security). The ratings represent the rating agencies' opinions of the quality of the securities they rate. The ratings, expressed in Moody's nomenclature, range from Aaa ("judged to be of the highest quality, with minimal credit risk") to C ("the lowest rated class of bonds, typically in default, with little prospect for recovery of principal or interest"). Ratings are relative and subjective and are not absolute standards of quality.

Please carefully read the prospectus and summary prospectus and consider the investment objectives, risks, charges and expenses of Northern Funds before investing. Call 800-595-9111 to obtain a prospectus and summary prospectus, which contain this and other information about the funds.
