FUND STRATEGY

- Follow a quantitative, active equity strategy to select stocks based on a statistical analysis of historical relationships among value characteristics, stock prices and market capitalization ranges.
- Use a screening process designed to reduce exposure to stocks with negative fundamental indicators.
- Maintain a highly diversified portfolio, consistent with small-cap value benchmarks, in an effort to reduce the risks associated with any specific stock or industry.

PERFORMANCE as of 12/31/09

FUND	QUARTER	YTD	1-YEAR	ANNUALIZED			SINCE INCEPTION
				3-YEAR	5-YEAR	10-YEAR	
FUND	3.76%	17.77%	17.77%	-6.28%	1.36%	7.18%	8.93%

MORNINGSTAR CATEGORY AVG SMALL VALUE	4.00%	31.32%	31.32%	-6.13%	0.67%	8.63%	—

Performance quoted represents past performance and does not guarantee future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown here. Performance data current to the most recent month end is available by calling 800-595-9111.

Performance calculations reflect voluntary fee waivers in effect. In the absence of fee waivers, total return, growth since inception and dividends would have been reduced. Total return is based on net change in NAV assuming reinvestment of distributions.

Equity Risk: Equity securities (stocks) are more volatile and carry more risk than other forms of investments, including investments in high-grade fixed income securities. The net asset value per share of this Fund will fluctuate as the value of the securities in the portfolio changes.

Small Cap Risk: Small capitalization funds typically carry additional risks since smaller companies generally have a higher risk of failure.

Value Risk: Value-based investments are subject to the risk that the broad market may not recognize their intrinsic value.

¹ The Net Expense Ratio includes voluntary expense reimbursements by Northern Funds' investment advisers that may change or end at any time.

Please see back page for calendar year returns, investment terms and index definitions.

A Conservative Investment Approach

Northern Trust has built a tradition of strength and stability in investment management. Markets fluctuate over time, but we have remained steadfast in our disciplined, risk-managed investment philosophy.

² **Russell 2000® Value Index** is an unmanaged index measuring the performance of those companies included in the Russell 2000® Index having lower price-to-book ratios and lower forecasted growth values. It is not possible to invest directly in an index.

Trailing 12-month Price to Earnings Ratio: The sum of a company's price-to-earnings. Calculated by taking the current stock price and dividing it by the current earnings per share for the past 12 months.

Price to Book Ratio: A ratio used to compare a stock's market value to its book value. It is calculated by dividing the current price of the stock by the latest quarter's book value per share.

Beta: Beta represents the systematic risk of a portfolio and measures its sensitivity to a benchmark.

Up Market Capture: Measure of a manager's performance in up markets relative to the market.

Down Market Capture: Measure of a manager's performance in down markets relative to the market.

Information Ratio: A measure of the consistency of excess return.

Please carefully read the prospectus and consider the investment objectives, risks, charges and expenses of Northern Funds before investing. Call 800-595-9111 to obtain a prospectus, which contains this and other information about the funds.
